

## **PowerTeacher Mobile App setup**

If the mobile app fails to automatically detect Noblesville Schools, you can manually add the needed information to use the mobile app by clicking on the settings gear icon near the upper right of the screen. From the settings menu, choose server settings.

For the server address enter: [powerschool.nobl.k12.in.us](https://powerschool.nobl.k12.in.us)

For the port number enter: 5443

Make sure that SSL is shown as On

Once those 3 pieces of information are entered, return to the login screen. Enter your username and password and the school list should now populate when clicked to allow you to choose your school.
