This Week's Travel Log

Our learning targets for the week are:

- I can measure and draw line segments to the nearest centimeter.
- I can find the missing input and output numbers in "Where's My Rule?" problems.
- I can identify a quarter and know its value.
- I can estimate length to the nearest centimeter.
- I can use subtraction fact strategies to find differences.
- I use addition to check subtraction problems.
- I can read and write words containing the vowel diagraphs **oo** as in **cool**, **ew** as in **new**, and **ou** as in **you**.
- I can read and write homophones, words that sound the same but have different spellings and meanings like knew/new; blue/blew; and two/too.
- I am involved in reading by asking myself questions before, during, and after reading a selection, thus increasing my comprehension of the text.
- I can write a story that is 3-5 sentences long about an experience I have had that will become my Young Author's Book.

A Note From Ms. Boyd

If your child hasn't already begun to do so, now is good time for him/her to start memorizing his/her addition facts with answers to 10. Our goal is for your child to know these facts so well that they can say the answer to each of them within 2 seconds. The children have been introduced to many tools they can use to help them practice these facts: xtramath.org; the games at everymathonline.com like the EM Facts Workshop Game, Tric-Trac, and Addition Top-It; the Fact Triangle Flashcards your child should now be keeping in his/her red folder, etc. If you have any questions about these resources, please let me know. ☺

All Roads Lead
To Learning!
